

Portacool 20" Evaporative Air Cooler

Please review these instructions before operating the equipment.

BEFORE YOU BEGIN Level surface · Clean water · Clear airflow · Grounded outlet

1 SETUP

- Place the cooler upright on a stable, level surface in a well-ventilated area.
- Keep the air intake and discharge sides clear of walls, curtains and other obstructions.
- Plug the unit directly into a properly grounded outlet and keep all electrical connections dry.

2 FILL WATER RESERVOIR

- Fill the reservoir with clean water before using the COOL / evaporative function.
- Customer is responsible for filling the reservoir. Do not overfill, and wipe up spilled water before operation.

3 USE

- Turn the unit on using the control panel or remote, then select LOW, MEDIUM or HIGH fan speed.
- Use the COOL / evaporative setting only when water is in the reservoir. Check the water level and refill as needed.
- For best cooling, allow fresh air into the area and provide a path for warm, humid air to escape.

4 AFTER USE & RETURN

- Turn the cooler off and unplug it before moving, draining or handling the unit.
- Drain remaining water before transport or return. Do not hose down or immerse the control panel, cord or electrical components.
- Return the unit free of trash and excessive debris. Rental price does not include setup.

HAVING A PROBLEM? CALL US RIGHT AWAY: 305-969-1025

Stop using the equipment and contact Christina's Party Rentals as soon as an issue is discovered. We can assist by phone or, when appropriate and available, dispatch a technician to your event.

Service calls are subject to availability, location and timing. If a technician is dispatched and the equipment is found to be operating properly and the issue is determined to be user error, additional service fees may apply.
